PROBLEM STATEMENT

The Silent Struggle: Many students hesitate to ask questions due to fear of judgment or embarrassment

Consequences: Unresolved doubts, reduced confidence, and poor academic understanding.

The Gap: Existing systems lack anonymous, structured support for shy or introverted students

INTRODUCTION

This platform introduces a centralized digital environment designed to support student learning

Students often struggle to ask questions due to social anxiety or fear of peer judgment.

The system aims to:

- Encourage participation without fear.
- Motivate students through a supportive environment.
- Organize academic materials efficiently.
- Simplify administrative tasks like attendance.

SYSTEM OVERVIEW

Project Vision

Goal: Create a safe, inclusive, and judgment-free digital environment.

Key Aims:

- Encourage question-asking without fear.
- Improve academic confidence and participation.
- Simplify resource access and attendance tracking.

System Overview

YDefinition: A web-based platform providing secure, anonymous communication and structured tools.

Core Modules:

- Anonymous Lecture & Public Q&A Systems.
- Subject-organized Document Library.
- QR-Based Attendance System.

System Scope

- Anonymous posting and lecture-based Q&A.
- Organized document sharing (self-paced learning).
- QR-based attendance to reduce disruptions.
- Secure authentication and role-based access.

ANONYMOUS LECTURE INTERACTION Q&A SYSTEM

Designed to encourage student participation by allowing anonymous question submission during lectures, especially for those who may feel hesitant to speak publicly.

- Enables students to ask questions anonymously without interrupting lectures
- Maintains smooth and uninterrupted lecture flow
- Allows lecturers to easily manage and respond to student questions
- Enhances student–lecturer engagement and promotes an inclusive learning environment

ANONYMOUS PUBLIC Q&A SYSTEM

- This contain about a platform that enable the user to asked question from the university student with or without revealing their identity
- Once you upload a new post it will appear in the top of the feed to interact more with other students. So you'll be able to find the answers quickly and save your time.
- When user getting more answers for the question so the question will be reach more and more to the other users to get an accurate answer so it will help all the users to equal learning opportunity.
- This platform is 100% safe and not be used except educational Q&A if any other unwanted questions are there it will be deleted by admin team
 - Student identity protection
 - Reduced academic anxiety
 - Equal learning opportunities
 - Safe environment for questions

LIBRARY DOCUMENT SHARING SYSTEM

Responsible for organizing materials by subject and week. It ensures easy access to lecture notes and study guides for self-paced learning. And it facilitates,

- Subject-wise material organization
- Self-paced learning support
- Centralized resource access
- Easy document retrieval

USER MANAGEMENT

Responsible for managing user authentication and secure access to the platform. It ensures that students and lecturers can securely sign in to use the system's features. And it facilitates,

- Secure User Sign-In: Providing a safe login process for all users.
- Identity Verification: Confirming the identity of students and staff.
- Authorized Access: Ensuring only registered users can access the modules.
- Account Privacy: Protecting the user's login credentials and basic profile.

QR-BASED ATTENDANCE SYSTEM

Responsible for efficient attendance tracking using QR codes. It minimizes classroom disruptions during the sign-in process. And it facilitates,

- Efficient QR tracking
- Minimized classroom disruptions
- Real-time attendance records
- Streamlined sign-in process

TOOLS AND TECHNOLOGIES

Responsible for the development, styling, containerization, and version control of the Academic Support System. It ensures a modern, scalable architecture and efficient workflow. And it facilitates,

- MERN Stack (MongoDB, Express, React, Node.js)
- Tailwind CSS
- Docker
- VS Code
- Git
- GitHub

CONCLUSION

Responsible for summarizing the project goals and the impact of the Academic Support System on the student community. It ensures a final understanding of our vision for a smarter education system. And it facilitates,

- Seamless Academic Support: Providing a centralized platform for all learning needs.
- Inclusive Learning Environment: Empowering shy students through anonymous participation.
- Efficient Resource Distribution: Ensuring 24/7 access to structured study materials.
- Modernized Operations: Automating attendance and tracking through digital solutions.

**THANK
YOU**
